Organisation: Norwich Canoe Club

Location/Activity: Norwich Canoe Club - River Wensum

Date of Assessment: 24/7/18

What are the hazards? (List <u>signifi-</u> <u>cant</u> hazards)	Who might be harmed?	How they might be harmed	Risk Value (1-16)	What we are already doing? (Current Controls)	Do we need to do anything else to manage this risk? (Further Controls)	Action by whom?	Action by when?	Done

RISK ASSESSMENT (1)

Water	All participants	Drowning through injury and cramp	8	<p>A safety briefing will be given before the start of each session by the group leader to identify the aims and objectives and specific risks associated with the session. The group leader records everyone's name before the start of the session. All participants comply with club rules on wearing buoyancy aids All paddlers in Div 7,8 and 9 and Lightnings to wear Buoyancy Aids. Junior Paddlers in Divs 1 to 6 may only paddle without a buoyancy aid when a buoyancy aid exception form has been filled in and filed at the club. All paddlers may be asked to wear buoyancy aids if the coach in charge deems that the weather conditions require it.</p> <p>A safety briefing given before activity covers any dynamically assessed hazards. All boats to have adequate buoyancy, which is checked in an on going manner by all coaches.</p>	Appropriate monitoring of paddlers throughout session.	Chief coach.	Continuous throughout session

RISK ASSESSMENT (1)

Entanglement with weed under the water / or trees above the water creating panic	All Participants	Panic caused by weed on river bottom	8	At safety briefing if there are paddlers who are vulnerable and deemed likely to fall in they are reminded of the danger and told to be aware there can be weed in river. This can be worse depending on the time of year. Reminder that touching weed is a strange feeling but there is no need to panic.		Chief coach.	Continuous	
Existing medical condition that could be an issue	All Participants	Existing medical condition such as Heart condition / epilepsy / asthma which could be exacerbated by exercise	8	The Club to have an up to date written medical history of any serious condition of all members and to have discussed any issues with participants in private if necessary. All coaches involved with the session to be made aware if there are particular needs. Particular attention should be given to those with asthma to ensure they have their inhalers with them.		Chief Coach	Before Session	

RISK ASSESSMENT (1)

Muscle Strains	All Participants	Muscle or ligament strains	6	Ensure all participants have warmed up properly before the session. Paddlers lift and handle boats with care bending the knees and with a straight back. Reminders are given to anyone who is seen not following best practice by all coaches.		Chief coach.	Before Session	
Pollution / water quality	All Participants	Leptospirosis/,Infection transmitted by contaminated water containing animal urine to come into contact with breaks in skin, the eyes or mucous membrane		Head Coach to remind all of hygiene requirements at the Safety briefing. An?bacterial hand wash is available, and showers are available Open /unhealed cuts to be covered prior to accessing the water.		All Coaches to remind paddlers of hygiene requirements	Coaches to monitor	Prior to start of session
Near Misses	All Participants	Potential impact injuries	4	Near misses must be reported on the near miss report form so that a review of the risk assessments can be carried out. At safety brief all participants talked through river safety.		Chief coach.	Continuous	

RISK ASSESSMENT (1)

Hypothermia / dehydration	All participants	Hypothermia due to exposure to cold water.	4	Paddlers to wear suitable clothing for the time of year. The group leader checks and advises that all participants are appropriately dressed for the conditions during the session The group leader monitors individuals to see if they start to show signs of cold, dehydration or distress. Paddlers retiring from sessions due to the cold are to shower as soon as possible after their session.		Chief Coach	Continuous throughout session	
Infections from cuts or open wounds	All participants	Open wounds or cuts may get infected by the water.		All participants should shower and wash open wounds after sessions.		All participants	Before and after session	
Equipment failure	All participants	Fall from board / and or cuts if equipment fails.		All equipment will be checked regularly and if any damage is found it will be labelled with a red triangle and not used until mended.		Chief Coach	Before session	

RISK ASSESSMENT (1)

Slips, trips and falls	All participants	May be injured if they trip over objects or slip on wet surfaces particularly when entering the water.	2	Warnings given to those taking part if areas become slippery because of the weather conditions. Getting in and out can be potentially slippery. There may be mud on the bank at the get in and the sleepers may get slippery where the rowers get in		Chief Coach	Before and after session	
Standing on sharp object on the river bed	All participants	standing on sharp object on the river bed such as broken glass or syringe needles	2	All vulnerable paddlers - that is those who are beginners or learning - to wear shoes or protection on feet such that if they stand on the bottom of the river bed they are protected.		Chief Coach	continuous throughout session	
Weather	All paddlers and Coaches	Awareness of summer thunderstorms	1	Keep a constant eye and stay close to the club. Paddle back to the club if there is Lightning as we have been given advice that getting out and standing under a tree for shelter is more dangerous than paddling back.		Chief Coach	Continuous	

DO THE ABOVE CONTROL MEASURES ADEQUATELY REDUCE THE RISKS?

YES/NO?
