

Policy for transportation of club boats.

Roof racks/trailers;

All crew boats should be bagged before loading.

Any single that has its own bag should be bagged.

Boats should only be carried on V bars on roof racks using straps, not elastics.

No boats should be tied down to the front or rear bumpers, just to the V bar.

The rear overhang should be marked for other vehicles to see the overhang.

Trailers.

All boats should be tied to the racks, all boats on the top rack should be double strapped.

Boats carried lower down can be slung or strapped down, using straps or tensioning ties.

Boats tied up side down with no bags should have the seats removed.

All boats should be resting on rubber or foam protection.

Crew boats should have at least one cockpit resting on the rail.

K4's should only be loaded and transported by authorised drivers.

High end K2's should only be loaded and transported by authorised drivers.

NORWICH CANOE CLUB.
